

Nutrition & Exercise Physiology

Seminar Series

Spring 2017 Schedule

Date	Speaker	Lecture Title
Jan 19	Colleen Spees, RD, PhD Ohio State University	<i>GROWING HOPE: A garden-based intervention improves quality of life and health outcomes in cancer survivors</i>
Jan 26	Erin Barbaro Institute for People, Place and Possibility, Columbia, MO	<i>Community Commons: Improving communities and inspiring change through data, tools and stories</i>
Feb 2	TBA	
Feb 9*	Mark Pereira, PhD University of Minnesota	<i>Posture, light physical activity, and chronic diseases: A paradigm shift?</i>
Feb 16	Hannah Holscher, RD, PhD University of Illinois	<i>Interplay of diet, the gastrointestinal microbiota, and health and disease</i>
Feb 23	Greg Graf, PhD University of Kentucky	<i>Reverse cholesterol transport: Routes & regulations</i>
Mar 2	Fatiha Nassir, PhD University of Missouri	<i>Sirtuin 3: A regulator of mitochondrial function and non-alcoholic fatty liver disease</i>
Mar 9*	Charles Roberts, PhD Oregon Health and Science Univ.	<i>Novel aspects of adipose tissue structure and function</i>
Mar 16	Sue Bodine, PhD University of California, Davis	<i>Aging and the attenuated response of skeletal muscles to growth signals</i>
Mar 23	Nutrition & Exercise Research Day	
Mar 30	Spring Break	
Apr 6	Glenn Gaesser, PhD Arizona State University	<i>Is high-intensity interval exercise training really superior to moderate-intensity continuous training? Lessons learned from multiple rejected hypotheses</i>
Apr 13	Life Sciences Week	
Apr 20	Justin Rhodes, PhD University of Illinois	<i>Origins of exercise effects on the brain</i>
Apr 27	Experimental Biology in Chicago	
May 4	Stephanie Chung, MBBS National Institute of Health	<i>Unraveling the hepatic paradox in African descent populations: Insights from stable isotope studies of glucose and lipid metabolism</i>
May 11	Stuart Phillips, PhD McMaster University	<i>Exercise and diet-induced changes in body composition and skeletal muscle metabolism</i>

Seminars are held in Acuff Auditorium, School of Medicine on Thursdays from 4:00 – 5:00 PM.

* This Seminar will be held in Gwynn Hall, room 220
