Research subjects needed to participate in a 1-day Nutrition/Drinking Study

Are you:

a 30 - 50 years old male?

a Fan of tailgate food?

A nonsmoker?

Interested to know how much muscle and fat you have on your body?

If so, please contact Dr. Elizabeth Parks at (573) 884-1708 for more information about a scientific study conducted by Researchers at the University of Missouri. The focus of her study is to determine how alcohol and food impacts your liver production of fat.

Compensation will be provided for the one overnight hospital stay that is required.
